Business rebound followed by results rebound in H2

As a reminder, margins were penalised by a squeeze effect in H1: gross profit was stable in organic and costs rose due to staff reinforcement. In H2, thanks to the GP rebound (+6% LFL) margins started to recover boosting the operating profit/GP ratio to 12.0% (+90bps YOY) versus 11.8% expected. FY 2013 operating profit thus came in at EUR4.6m +8% YOY, in line with our estimate. The dividend was announced at EUR0.8, +7% YOY (vs. flat exp.) for a yield of 3%.

Scenario for 2014 too cautious?

Thanks to staff reinforcement and development abroad, management is aiming for significant growth in 2014. The analyst meeting (today at 11:30 CET) will allow us to verify whether or not our scenario for 2014 is too conservative. In a still tough economic context in Europe, we expect +2.4% GP growth, after +3.2% LFL in 2013. We also foresee a gradual margin recovery with the EBIT/GP ratio expected at 11.5% for 2014, compared with more than 15% in the past.

Good news almost fully priced in, Hold reiterated

As expected, the GP rebound was followed by margin rebound in 2013, which is expected to be confirmed in 2014. After the recent share price performance, we estimate that the good news is almost fully priced in and that upside is now more limited. Hold reiterated.
