As the acceleration of sales growth was significantly above our forecast (+30% vs. +15% exp), Q3 sales came in at EUR34m vs. EUR30m estimated. However as the additional sales growth came from the adjustment for oil price increases and for sea freight rate hikes, gross profit growth remained slower than sales growth over Q3 (+10.1%) to EUR6.6m in line with our estimate. Management reiterated its guidance of double-digit sales growth for 2007, but as the group should be penalised mainly by higher labour costs (commercial team reinforcement), they announced a stable net profit in 2007, below our estimate of +10%. To integrate the new guidance we have decreased our net profit estimate by 15% on average for the next two years (target price cut to EUR21). Although stability in net profit targeted for 2007 is rather disappointing, it corresponds to investment to ensure future growth. As the mid-term outlook remains promising, we reiterate our BUY opinion.

### Q3 sales growth significantly above estimates, but gross profit in line

In light of the positive tone shown for the activity at end-September, we had integrated a slight acceleration in sales growth over Q3 to 15.0% after +14.1% in Q2 and +11.6% in Q1. As the acceleration of sales growth was significantly above our forecast (+30% in Q3), Q3 sales came in at EUR34.3m vs. EUR30.4m estimated.

However as the sales growth came mainly from the adjustment for oil price increases (+5% at end of 9 months, after +2.5% for the H1 sales performance,

#### Sales guidance reiterated, but net profit guidance down

Management reiterated its guidance of double-digit sales growth for 2007. In light of the performance posted at the end of the first nine months (sales up 18.9%), and as we do not expect a price effect slowdown in Q4, we estimate that our previous sales forecasts were too conservative (sales expected up 14%). We have thus revised upward our sales anticipation to EUR127.4m for 2007 (up 20%). Mechanically we have raised our sales forecasts for 2008 and 2009.

Like in Q3, as the better sales performance should mainly come from the price adjustment, the impact on results should not be significant. We have thus not increased our gross profit estimate. Management announced that net profit in 2007 should be flat compared with 2006 (EUR2.5m), below our estimate of +10% over the year, due to higher—than-expected external costs and most of all higher labour costs. They seized opportunities to hire experienced salesmen, that augurs for a pursuance of strong organic sales growth but that is weighing on profitability. To integrate the new guidance announced, we have decreased our net profit estimate by 15% on average for the next two years.

### BUY opinion reiterated, target price cut to EUR21

In light of the strong sales growth posted over the first nine months, and the reinforcement of the commercial team announced, we are rather confident in the sales outlook. The group should now have to put in place the structure to achieve around EUR300m in sales, therefore we do not expect a significant increase in fixed costs in the coming years, that should allow the group to improve its margins in parallel with strong sales growth. Moreover management has reiterated its intention to seize external growth opportunities to accelerate sales and results growth. Although stability in net profit targeted for 2007 is rather disappointing, we reiterate our BUY opinion on the name as the mid-term
